EDUCATION

BME — BUDAPEST

Mechatronics, Intelligent Embedded Systems
— MSc 2015 – 2017

BME — BUDAPEST

Mechanical Eng., Modeling — BSc, Excellent
2011 – 2015

ZRÍNYI MIKLÓS GRAMMAR SCHOOL

Advanced Maths & Physics — Zalaegerszeg
2005 – 2011

HAVLIK TAMÁS

CTO · AI AUTOMATION ENGINEER

ABOUT ME

Mechatronics engineer (MSc) and co-founder / CTO of DiabTrend. Language-agnostic builder focused on AI-driven full automation — from deep learning to full-stack and high-performance computing (C++, CUDA, OpenCL). Multiple-time programming & ML competition winner.

AWARDS & COMPETITIONS

- **Ericsson C++ Challenge — 1st**
Hungary, 2014
- **Numer.ai International ML — 8th**
DNN competition, 2016 Feb.
- **“From Idea to Business” — winner**
DiabTrend, 2015
- **Hajós György Math — 1st team**
8th individual, 2013
- **Izsák Imre Science — 1st & 3rd**
2011 / 2010
- **Telekom Data Hackathon — award**
Data science, 2016
- **Numer.ai International ML — 10th**
DNN competition, 2016 Jan.
- **BME Mathematics — II. award**
5th overall, 2015
- **National OKTV finals**
Physics 12th/19th; Informatics 14th/28th
- **BME TDK & Physics awards**
Honorable mention; II. award

JOB EXPERIENCE

- **TODOFORAI — AI ORCHESTRATOR** 2025 – Present
todofor.ai
Building an AI orchestration platform — agentic workflows for full end-to-end automation.
- **DIABTREND — CTO** 2018 – Present
DiabTrend AI Analytics Kft.
CTO / co-founder, working alongside Marcell Havlik (CEO). Led product & engineering and supported early-stage / pre-seed investment processes.
- **EXPERIENCED DEVELOPER** 2016 – 2017
Ericsson Hungary
C programmer. Crypto trading & first blockchain projects in parallel (2017).
- **DIABTREND — CO-FOUNDER & ALGORITHM DEV** 2015 – 2016
StartUP
RNN neural networks, supervised learning. AlexNet CNN for traffic-sign recognition. Built a C++/OpenCL → CUDA ML engine.

HOW I WORK

Language-agnostic, right-tool-per-problem. Systems kept **lean & bare-metal** (no VM/container wrapping). **AI full-automation** as the default — and I teach engineers to run real work end-to-end with AI.

AI full-automation

Agentic workflows

Python

Julia

C++ / CUDA / OpenCL

JS / React Native

Deep Learning

Linux / bare-metal

HPC & GPU
